

Sequoia & Kings Canyon National Park- California

A Land of Giants

This landscape testifies to nature's size, beauty, and diversity - huge mountains, rugged foothills, deep canyons, vast caverns, and the world's largest trees.

Sequoia and Kings Canyon National Parks lie side by side in the southern Sierra Nevada, east of the San Joaquin Valley. Visitor activities vary by season and elevation (1,370 to 14,494 feet).

Did You Know?

The small gravity-defying cave formations found in Sequoia and Kings Canyon caves are known as helictites. They form due to the capillary action of acidic solutions and are composed of the minerals calcite and aragonite.
